Latest Updates

Updates and new features in Intent to Pay (ITP) Online Help:

March 26, 2024

New Look and Feel for ITP module

All screens in ITP have moved to the new visual appearance adopted by other eRA modules. The capabilities remain the same. The ITP screens will adopt the new standard features being incorporated in eRA modules, such as:

- Grid tool to specify how many table rows appear per page Grid tool.
- Download tool icon to export table data to Excel.
- Apps menu icon to navigate to other modules Apps menu icon to navigate to other modules.
- Updated header and footer.
- Action menus and buttons are aligned to the right on all screens.
- Updated Bulk Actions buttons on all hitlist screens.

See [Basics and Navigation for eRA Modules](#) for more information.

October 25, 2023

- **New Look and Feel for Online Help and User Guide**

- The online help and user guide have been updated to the new look and feel, consistent with the new look and feel of eRA Modules. There are no changes to the organization or function of the help topics.

- **RFA/PA Label Changes**

- The RFA/PA label has been updated to the Opportunity Number label in the ITP module.

- **Wildcard Search**

- The ITP Search screen now supports wildcard searches for the PCC and Institution fields. See [Search for ITP](#) for more information.

Accessing Intent to Pay (ITP)

Perform one of the following options to access ITP:

- Navigate your browser to <https://apps.era.nih.gov/payplan/itp/>.
-OR-
- Go to <http://inside.era.nih.gov> and click the Launch hyperlink under the module name.
Click All Modules if you don't see the module.
-OR-
- If you're already logged in to the eRA application suite, click the **ITP** tab in the menu bar at the top of the screen.

Logging In

When you take one of these actions, the NIH Login screen opens: For instructions on logging in, see [Login screen for internal HHS staff](#).

After successful login the [ITP Search](#) screen opens.

NOTE: If you see an eRA/IMPACII Systems Rules of Behavior page, you must read it over and agree to terms before you are allowed to access IMPACII modules. See [eRA/IMPAC II Rules of Behavior Agreement](#) for more information.

Basics and Navigation for eRA Modules

For increased usability, eRA modules are gradually switching to a streamlined, modern, mobile-friendly look and feel for screens. The new look and the new navigation adjust dynamically for a variety of screen or font sizes, making your browsing experience more efficient on the device of your choice. New user interface elements offer a consistent set of tools that you can use across modules. A new header and footer conserve space, leaving more work area for you to accomplish your tasks.

This topic explores the new navigation and user interface elements that you might see on updated screens. All modules will eventually use the same framework for building the appearance and navigation for screens. Older style screens will co-exist with updated screens during the transition to the new look and feel. Not all screen elements shown here will appear in all modules.

Read this topic to learn about:

- Header/footer for eRA modules
- Navigation to and within modules
- Actions column and how it might be replaced by an ellipsis (three-dot) dropdown in a row
- Standard tools for tables

Header and Footer Navigation

A [mixture of older and newer headers](#) may appear throughout screens in eRA Modules. During a period of transition, you will see both older and newer style screens in eRA modules.

The new header and footer use symbols to save screen real estate and dynamically adjust to fit smaller screens.

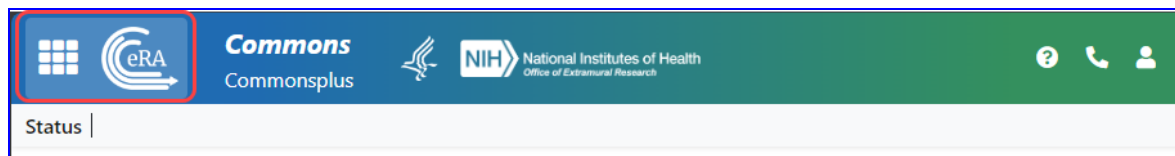

Figure 1: Full eRA Header with Main Menu at left, which displays module navigation, outlined

The first icon from left is the Main Menu. The Main Menu shows all apps available to the currently logged-in user, shown below:

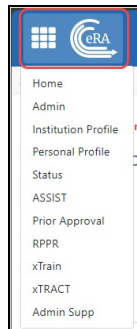

Figure 2: Expanded Main Menu, showing all modules to which you have access

Other Icons in Header

Links to the Department of Health and Human Services.

Links to grants.nih.gov.

Links to a general eRA Service Desk Support page.

Links to eRA Points of Contact page.

The person icon shows your login information, institution, a link to change your password, email preferences, and sign out link:

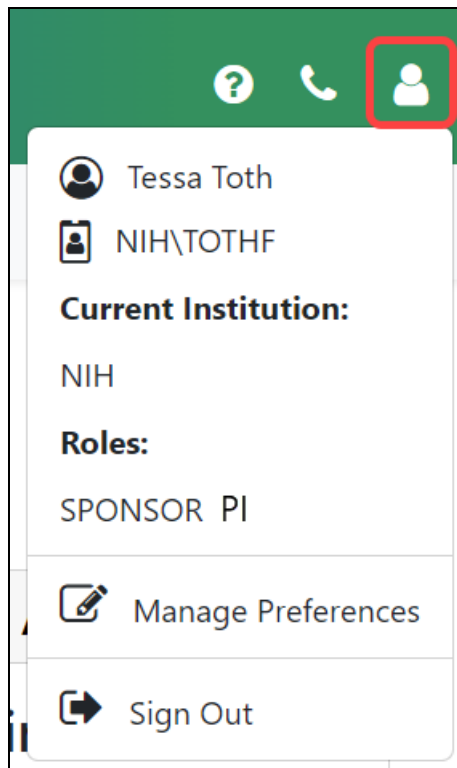

Figure 3: Person icon menu, showing name, user ID, institution, roles, and sign out link

Dynamic Header

Below, on a narrow screen, most items on the header are hidden, but they pop down when you click the grid icon in the upper right, circled below.

Figure 4: Narrow eRA Header, which hides all banner options under a bento box icon, shown at right

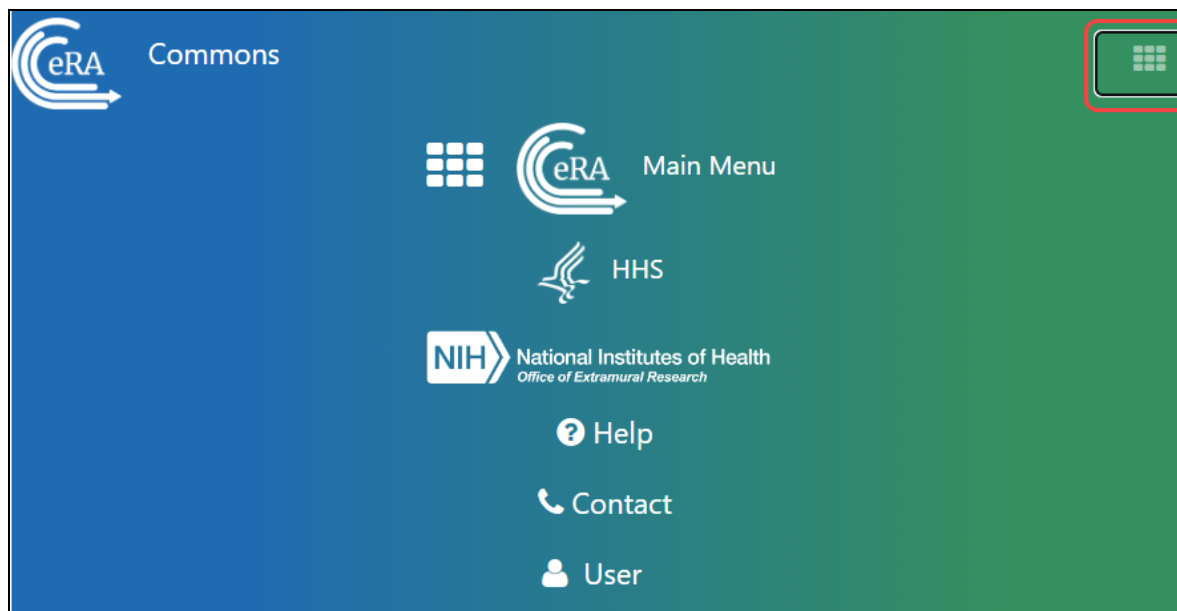

Figure 5: Narrow eRA Header, which has been expanded to show all banner options after bento box icon is clicked

Redesigned Footer

The footer is clean and offers only essential information organized into columns.

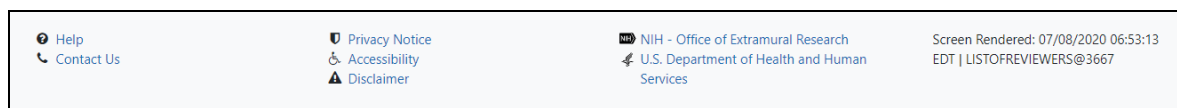

Figure 6: eRA Footer

Navigating Within a Module

The module abbreviation, circled below left, lets you quickly see which module you are working in.

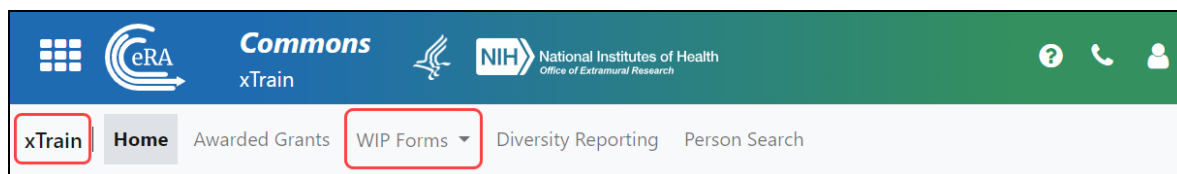

Figure 7: Navigation within a module, showing module name at left and module pages in navigation along top under banner

The sections of the modules are listed across the top, with the current section highlighted in gray, circled above.

To navigate to the screens available under each section, click the section name to see a dropdown that shows all screen names, as shown below.

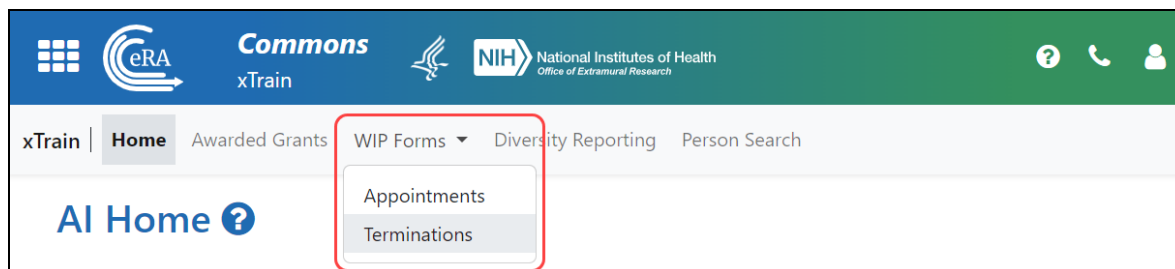

Figure 8: Module Navigation with Dropdowns of Screen Names

If the screen size is small, all the app section names are collapsed under a three-line icon, shown below.

Figure 9: Module Navigation is collapsed when narrow, with bento box icon at right which when clicked shows all module top navigation

When clicked, the three-line icon shows all module navigation in vertical form, below.

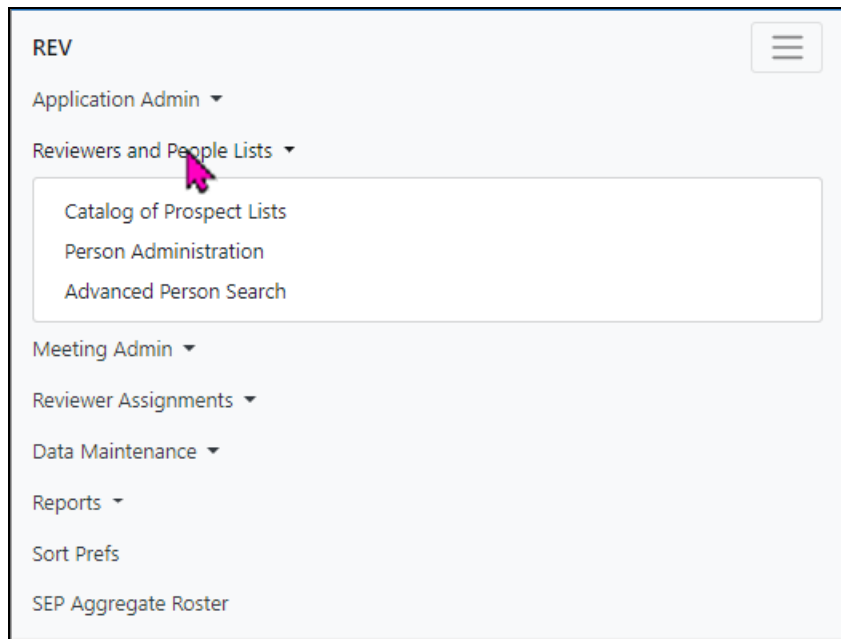

Figure 10: Module navigation expanded, when screen is narrow and all top navigation is under bento box icon at right

Actions Column Replaced by Ellipsis Menu

Actions that are available for each row in a table might be displayed under a three-dot ellipsis icon instead of an **Actions** column, as shown below. This happens if there are three or more actions to be displayed. If only one action item is listed, then the column will list that action as the header and have an 'x' in the body of the column.

Application/Award ID	Grants.gov Tracking #
5K08AG050505-02	...
1R21AR020202-01A1 (MPI)	RPPR
	Human Subjects

Figure 11: Three-dot ellipsis menu replaces action menu and displays actions that can be taken on a record in a table

Standard Tools for Tables

Tables are sleeker with tools for showing the data you want to see.

Figure 12: Section of a table header showing standard table tools shown outlined

Filter Table

Entering filter text features instant filtering of the list as you type, with the number of found results updated as you type. The text you type in the filter field is highlighted in the table.

Figure 13: Filter Table Field with Number of Found Results

Selecting Rows/Bulk Action Tool

Use the bulk actions tool  to select or deselect all, and to show selected rows only or all rows. Other bulk action tools might also let you mark or clear the checkboxes of all currently visible rows (such as those found by typing filter text).

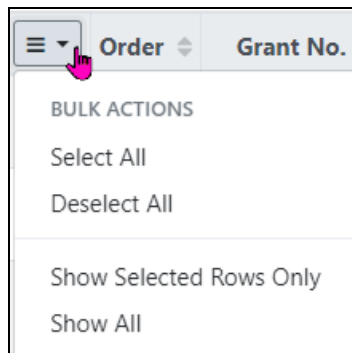

Figure 14: Bulk Actions Tool Lets you Show/Hide and Select/Unselect Rows

Check All

Check All marks all checkboxes regardless of the number of pages of records shown. In other words, if there are 10 pages of records available, with only the first page currently visible, **Check All** marks all enabled checkboxes on all pages. By contrast, **Check All Visible** marks only those enabled checkboxes on the currently visible page. See **Page Navigation** below for directions on how to navigate between pages of data.

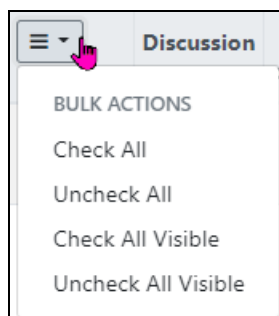

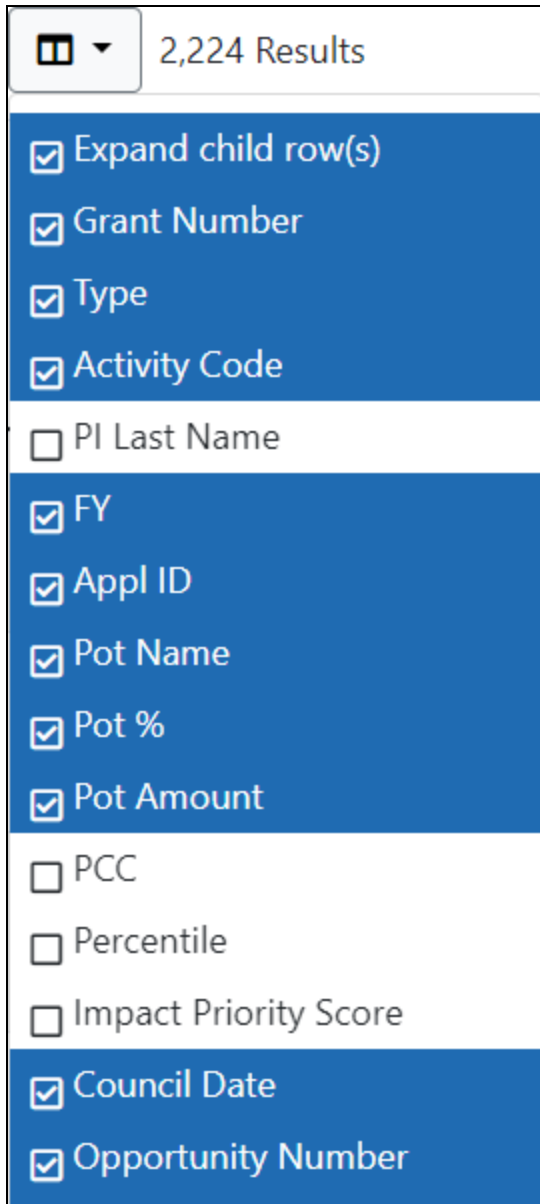

Figure 15: Bulk select tool example

Column Picker

Click to choose the visible columns in a table by selecting/deselecting their checkboxes. The column selection is only in effect until you navigate to another screen.

2,224 Results

- ☒ Expand child row(s)

- ☒ Type
- ☒ Activity Code
- ☐ PI Last Name
- ☒ FY
- ☒ Appl ID
- ☒ Pot Name
- ☒ Pot %
- ☒ Pot Amount
- ☐ PCC
- ☐ Percentile
- ☐ Impact Priority Score
- ☒ Council Date
- ☒ Opportunity Number

Figure 16: Expanded Column Picker, which lets you choose which columns are visible

Column Sorting

Click column headers to sort by that column.

Figure 17: Sort indicators in table columns

Download and Print

Use the download tool , shown below, to export table data to Excel or PDF, or to print. Data from all columns is exported/printed even if only a subset of columns are visible.

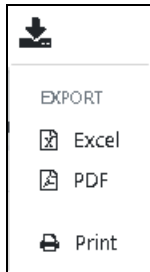

Figure 18: Download Tool lets you print or export to Excel or PDF

Rows Per Page

To help avoid scrolling, use the grid tool  to specify how many table rows appear per page.

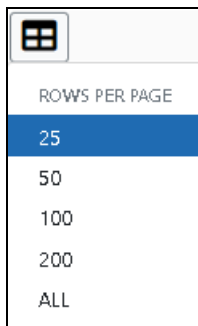

Figure 19: Grid Tool lets you choose number of rows displayed per page

Page Navigation

Navigate to each page of search results using the following tool:

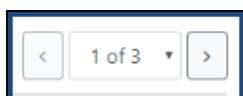

Figure 20: Navigation to move between pages of search results

Instantly scroll back to the top of the page by clicking the "Back to Top" button, which appears on selected screens that show long search results. The button is an up arrow in a yellow rectangle and appears at the bottom right of the screen, when applicable:

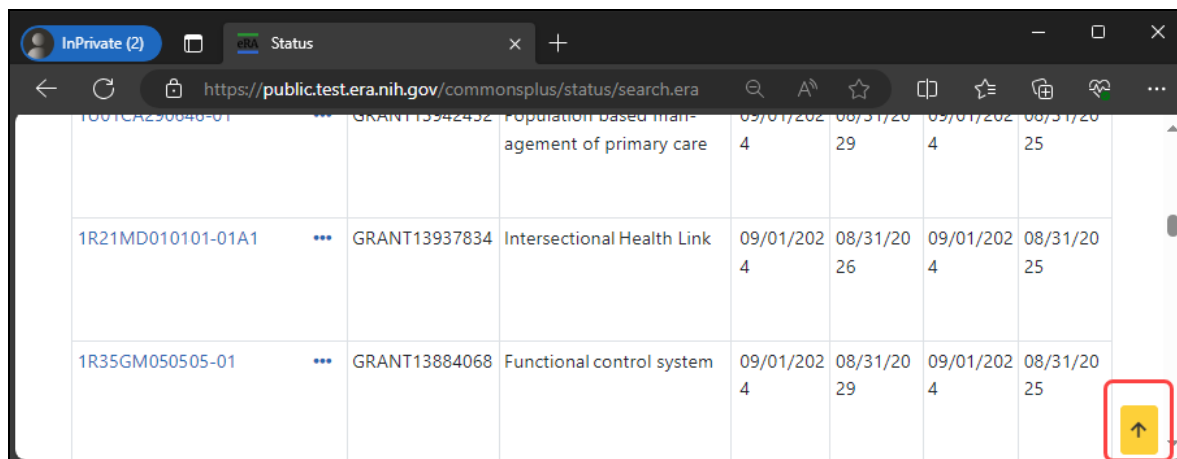

Figure 21: Yellow "back to top" button with up arrow in yellow rectangle, used to instantly scroll to the top of search results

Expanding Table Rows to Reveal More Details

Some tables have an indicator at the beginning of each row that more information can be viewed for the row. If you see a triangle pointing to the right at the beginning of a row, click it for more information on the record.

Overview

Intent to Pay Code

The **Intent to Pay** code can be updated after the review outcome is available and before the grant is awarded or terminated. Once the grant is awarded or terminated, the Intent to Pay (ITP) system does not allow any updates to the **Intent to Pay** code. For more information on automatically setting the **Intent to Pay** code, please refer to the [Business Rules](#) topic.

The **Intent to Pay** code values, listed alphabetically, are as follows:

- *D* (Deferred - The intent to pay decision has been deferred.)
- *N* (No - The agency does not intend to award the application.)
- *Y* (Yes - The agency intends to award the application.)
- *Null* (No value - The **Intent to Pay** code has not been set.)

ITP Module

The Intent to Pay (ITP) module provides a streamlined capability to set the **Intent to Pay** code for multiple applications simultaneously, as well as an individual application within the search results set. The ITP module also provides the ability for Institutes/Centers (ICs) to quickly find the applicable grant applications with specific search criteria, such that the **Intent to Pay** code can be set as well as the following field values:

- **Fiscal Year**
- **Council Recommendation Code**
- **Council Priority**

The **Fiscal Year**, **Council Recommendation Code**, and **Council Priority** values are updatable for competing grants only, identified by the Council Date not ending with 00 and with one of the following application types:

- 1 (New)
- 2 (Competing Continuation)
- 3 (Competing Revision/Administrative Supplements)

- 4 (Extension)
- 9 (Change of NIH Awarding IC for a Renewal Application)

The ITP module can be accessed by clicking on the **ITP** menu tab from the array of eRA menu tabs.

The **Intent to Pay** code can no longer be set in the Grant Update Module (GUM) module on the *Review Details - Edit* screen. The **Intent to Pay** code is viewable as read only on the GUM *Review Details* and the GUM *Review Details - Edit* screen. The **Intent to Pay** code can no longer be set in the Institute and Center Operations (ICO) module.

Notifications

For Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) applications, the ITP module sends Intent to Pay notifications based on the ITP code value to the appropriate applicant Institution(s) and/or sends notification reminders to the appropriate agency users at the appropriate intervals. For more information, please refer to the [Notifications](#) topic.

NOTE: If the **Intent to Pay** code has not been set after twelve months of the application submission, the system automatically sets the **Intent to Pay** code equal to *D (Deferred)* and a Deferred Intent to Award email is sent to the application.

Reporting

The ITP module links to the Search/View/Report (QVR) system via the **Reports** sub-menu tab. For more information, please refer to the Reporting topic.

The Intent to Pay System records the date and time and the email contact when the external email notifications are sent to the applicants in Grant Folder for reporting purposes.

ITP User Roles

The following describes the ITP user roles and their functionality:

Only users with the ITP_GRANT_UPDATE_ROLE or the ITP_COUNCIL_UPDATE_ROLE can see the **ITP** menu tab.

- ITP_GRANT_UPDATE_ROLE - can update the following fields for the administering Institute/Center (IC) of an application
 - **Intent to Pay**
 - **Council Priority Code**
 - **Council Recommendation Code**
 - **Fiscal Year**
- ITP_COUNCIL_UPDATE_ROLE - can update the following fields for the administering Institute/Center (IC) of an application
 - **Council Priority Code**
 - **Council Recommendation Code**
- Either role can update the following fields for the dual Institute/Center (IC) of an application
 - **Council Priority Code**
 - **Council Recommendation Code**

When the ITP code is set to Y (Yes), the council recommendation can be set to 1 (To be considered for funding - Pending Award) and the council priority can be set to CON (Council has concurred with IRG recommendation).

NOTE: Users with the ITP_COUNCIL_UPDATE_ROLE will be able to update the **Council Recommendation Code** and the **Council Priority** fields for their own IC.

Business Rules

The **Intent to Pay** code is updated on the parent grant application level only. Contracts and sub-projects are excluded. The **Intent to Pay** code can only be set after the review outcome is available and before the grant is awarded or terminated.

The following common Business Rules describe the ITP code's default value during the review process and whether it is editable:

The **Intent to Pay** code can be edited after the application has gone through Initial Review Group (IRG) review and a review recommendation has been given.

The **Intent to Pay** code cannot be edited for the following review and grant application statuses:

- Awarded (status code = 05)
- Entered into the computer (status code = 70)
- Pending IRG Review (status code = 17)
- Terminated (status code = 03)
- Withdrawn after review (status code = 02)

Several events in the following eRA modules also trigger a default setting value of the ITP code.

eRA Module	Event	Default ITP Code Value	Comments
Grants Update Module (GUM)	Application Withdrawn (Status 02)	No	ITP Code value set to No only after Review outcome is available
Assignment Change Request (ACR)	Application Withdrawn (Status 02)	No	ITP Code value set to No only after Review outcome is available

eRA Module	Event	Default ITP Code Value	Comments
Peer Review (REV)	Review Outcome NRFC or no IRG recommendation	No	
Grants Management (GM)	Grant is issued and ITP code is not already set to Yes	Yes (at grant release time)	Also set Council Recommendation Code to 1 (To be considered for funding - Pending Award); and Council Priority Code to CON (Council has concurred with IRG recommendation).

Default ITP Code Value per eRA Module

Intent to Pay (ITP) Search Screen

The *Intent to Pay* search screen (default screen) provides the ability to search for the appropriate grant applications with specific search criteria in order to set the **Intent to Pay** code and update the **Fiscal Year**, **Council Recommendation Code**, and **Council Priority** field values, if appropriate. For more information, please refer to the [Overview - ITP Search Module](#) topic.

Users with the following roles can perform searches: ITP_GRANT_UPDATE_ROLE or the ITP_COUNCIL_UPDATE_ROLE. For more information, please refer to the [User Roles](#) topic.

Perform a Search

The *Intent to Pay* search screen defaults to the user's default IC and the current **Fiscal Year**. You must enter at least one of the following in the search criteria: **Appl ID**, **Fiscal Year**, and **IC**.

If none of these criteria is entered, a screen displays the following prompt message:
Please enter at least one of the following search criteria: Appl ID, Fiscal Year, and IC.

To access the *Intent to Pay* search screen, click the **Search** tab. If you have set a default search, the default search criteria automatically populate upon accessing the *Search* screen.

Figure 24: Intent to Pay Search Screen

Use the search parameters to limit the number of applications returned, based on your needs. For example, use FOA to return all applications on a particular FOA, enter one or more appl ID to return specific applications, etc.

1. Enter search parameters as needed.
2. Please refer to these field topics for more information:
 - [My Saved Searches](#)
 - [Activity Code](#)
3. The **PCC** and **Institution** fields support wildcard searches, using a % symbol for one or more characters.
 - *Example:* Enter 84% to search for any PCC that begins with 84, regardless of the number of characters following 84.
 - *Example:* Enter Coll% to search for an Institution that begins with "Coll," regardless of the number of characters following.

4. To include only SBIR/STTR grant applications, select the **Incl SBIR/STTR Only** check box.
5. To include only applications where ITP is editable, select the **Display only applications where ITP is editable** check box.
6. Click the **Run Search** button to execute the search, or select one of these actions:
 - Click **Clear All** to clear the fields and enter new search criteria.
 - Click **Save Search** to save the current search parameters. See [Save Search](#) for more information.
7. Click **Run Search** to display the [Set Intent to Pay](#) screen with the search results in a hitlist.

Default IC

The default IC is a required field that identifies the user's organization (such as NIH Institutes and Centers) that the user may administer, fund, and/or review grant applications. The default IC is effective for the entire session while the user is logged into ITP, and can be set each time for subsequent logins.

- The default IC setting is used to determine what council detail fields per IC the user can update in the hitlist on the Set Intent to Pay screen
- If the default IC is set to a dual IC, the user can only update the council detail fields for the dual IC.

Select the appropriate IC from the **Default IC** drop-down menu: To set a dual IC, select the secondary IC from the Dual IC drop-down field.

Users with More than One IC

1. When performing a search for the default IC, you can set the ITP Code, Fiscal Year, Council Recommendation Code and the Priority Code values for the default IC grant applications.
2. When setting the default IC to a dual IC of the application, you can only set the Council Recommendation Code and the Priority Code for the dual IC.

For information on setting the **Council Recommendation Code** and the **Council Priority** fields, please refer to the business rules for [Setting the Council Recommendation Code/Priority Code](#) topic.

Screen Field Information

The following field descriptions are listed in the order of appearance on the *Intent to Pay* screen.

Field	Description
My Saved Search	If present a list of saved search names appearing alphabetically with the default search listed first if set as a default search.
Default IC	Identifies the user's organization (such as NIH Institutes and Centers).
Appl ID(s)	The Application ID number(s) of the grant(s); enter multiple IDs in the text field using commas to separate.
Intent to Pay	Intent to Pay Codes; multi-select drop-down list.
Appl Status Group	Description for the status of the grants; drop-down menu.
Grant Number - Application Type	The drop down include competing application types only (1, 2, 3, 4, and 9); text field or look-up screen.
Activity Code	A code that identifies the subcategory of an extramural activity; multiselect typeahead text field or look-up screen.
IC Code	The two-character administering IC designation code; single-select drop-down menu.
Serial	The serial number of the grant number; text field; must be a num-

Field	Description
	ber.
Year	The support year of the grant number; text field; must be a number.
Suffix	Suffix of the Grant; text field.
Opportunity #	The number issued by ICD or assigned by the Institutional Liaison Office to a specific Opportunity; text field.
Dual IC	Secondary two-character administering IC designation code; single-select typeahead text field.
Contact PI	The principal investigator's first and last name; single-select typeahead text field.
Institution	The institution to which the grant(s) is issued; text field.
PCC	The Program Class Code of the administering IC; text field.
Council(s)	Multi-select of council rounds from previous, current, and future FY.
Fiscal Year	Enter fiscal year in YYYY format.
Budget Start Date	Budget Start Date for the application; conditional operators in a drop-down menu with a text field.
(MM/DD/YYYY)	Date MUST be entered in the MM/DD/YYYY format; can also use the calendar picker unless using Today's date in the conditional operator (On or Before Today, Today, On or After Today).

Field	Description
Priority Score	The priority score as a result of the SRG meeting; conditional operators in a drop-down menu with a text field.
Priority Score Value	The value to which the Priority Score conditional operators apply; text field.
Percentile	The percentile as a result of the SRG meeting; conditional operators in a drop-down menu with a text field.
Percentile Value	The value to which the Percentile conditional operators apply; text field.
SRG	Initial Review Group/Scientific Review Group (IRG/SRG) code of the meeting; text field.
SRG Flex	IRG/SRG flex code of the meeting; text field.
SRA Designator	The Scientific Review Administrator (SRA) designator code of the SRG meeting; text field.
SRO Flex	The flex code of the SRA designator code of the SRG meeting; text field.
Ext	The group code of the SRG meeting; text field.
Role Type	Used to search for grants assigned to persons identified within an IC as GMO, PO, or GS; drop-down menu.
Assignees	Combined with Role Type field, provides an alphabetical list (based on Role Type selected) of users within the IC selected which can be used to search for grants assigned to the selected

Field	Description
	name and role; drop-down menu.
Incl. SBIR/STTR Only	If checked, filters out all applications that are NOT SBIR/STTR; checkbox.
Display Applications where ITP is Editable	If checked, filters out all the applications where Intent to Pay Code is not editable; checkbox.

Intent to Pay Screen Fields

Save Search

To save search criteria for later use, click the drop-down arrow on the **Run Search** button on the *Search* screen. Select **Save Search**.

The screenshot shows the Search ITP screen with various search criteria fields. At the bottom right, there is a 'Run Search' button with a dropdown arrow. A red box highlights this button, and a dropdown menu is shown with the option 'Save Search' selected.

Figure 25: Search ITP screen showing Save Search drop-down button

The *Save Search* screen opens, displaying the search criteria (read only) entered on the *Search* screen. The **Search Name** can be entered and the **My Default Search** can be set to *No* (default) or *Yes*. The default search criteria automatically populate every time you access the *Search* screen.

If a default Institute/Center (IC) is selected, that IC is part of the saved selection criteria. A saved search cannot be updated.

Figure 27: Saved Searches screen

Previously saved searches display in a table. The table displays the Name, Created Date, and Search Criteria. A star icon  indicates a default search.

The default sorting is by the Created Date, displaying the most recent first.

An ellipsis icon  contains the Actions menu with the following options:

- **Set as Default** - Set the search criteria as the automatic search settings when opening the *Search ITP* screen. A search already set as the default does not display this option.
- **Delete** - Click to remove the saved search from the list.
 - Clicking **Delete** displays a warning pop-up message with the following message: *Are you sure you want to delete selected query(ies)?*
 - Click **OK** to continue or **Cancel** to return to the *Save Search* screen.

Use a Saved Search

On the *Search ITP* screen, select a saved search name from the **My Saved Search** drop-down field. The search criteria automatically populate into the affected fields.

The screenshot displays the 'Intent to Pay (ITP) Search Screen'. At the top, there is a navigation bar with 'ITP | Search' (highlighted) and 'Saved Searches'. Below this, the main content area features a 'Search' label with a help icon, a 'My Saved Search' label with a help icon, and an expanded dropdown menu. The dropdown menu lists two saved searches: 'SBIR' (highlighted in blue) and 'Priority Score FY24'. Below the dropdown, there is a text input field for 'Appl ID(s)' with a placeholder example: 'Ex: 01234567,12345678'.

Figure 28: My Saved Search field showing an expanded dropdown list of saved searches

Set Intent to Pay

The *Set Intent to Pay* screen displays the grant applications returned by the search function, and allows users with the `ICO_GRANT_UPDATE_ROLE` of the primary IC of the application to set the following field values:

- **Intent to Pay Code**
- **Fiscal Year**
- **Council Recommendation Code**
- **Council Priority**

The system allows up to 500 records to be updated in a batch mode by selecting the **Select All on All Page(s)** check box. This check box is automatically checked when a search is executed.

By default all editable records in the hitlist are automatically selected.

For information on setting the **Council Recommendation Code** and the **Council Priority** fields, please refer to the business rules for [Setting the Council Recommendation Code/Priority Code](#) topic.

The screenshot shows the 'Set Intent to Pay' screen. At the top, there's a search bar and a 'Saved Searches' link. Below the search bar, there are four dropdown menus for filtering: 'Set Intent To Pay Code', 'Set Fiscal Year', 'Set Council Recom Code', and 'Set Council Priority'. All are currently set to 'No Change'. To the right of these are 'Preview Update' and 'Save Update' buttons. A note states: 'Note: Non-competing, Awarded, Terminated, and Withdrawn applications are excluded from the search results hitlist. Not all fields in selected records may be updated due to privilege requirements. Please review all selected records to verify your updates.' Below the note, there's a 'Search Criteria' section with buttons for 'Default IC: 00', 'FY: 2023', 'No Flag(s): Yes', and 'Competing: Yes'. A 'Filter table' button is also present. The main table shows 290 results of 290 rows selected. The table has columns: ActivityCode/IC/Serial#, PI Name, Priority Score, Percentile, Council Round, Application Received Date, Intent to Pay, Notification Sent, Fiscal Year, and Council Details (Council Date, Recom Code, Council Priority). The first four rows are visible, each with a checkbox in the first column.

ActivityCode/IC/Serial#	PI Name	Priority Score	Percentile	Council Round	Application Received Date	Intent to Pay	Notification Sent	Fiscal Year	Council Details: Council Date, Recom Code, Council Priority
☒ 1T32GM144-01A1	CREEVEY, COLIN			202210	01-28-2022			2023 GM	202210, 1, COM
☒ 2R44FD007-02	Brown, Lavender			202308	03-20-2023			2023	
☒ 1X06SM089-01				202208	02-08-2024			2023	
☒ 1X06SM089-01				202208	02-08-2024			2023	

Figure 29: Set Intent to Pay screen

1. In the *Select Action* section, select the following fields as needed to set the appropriate value:

- **Set Intent to Pay Code**
- **Set Fiscal Year**
- **Set Council Recom. Code**
- **Set Council Priority**

2. Use the *No Change* option for fields that do not need to be set.

When the Code **Intent to Pay** is set to *Yes*, the system allows setting the **Council Recommendation Code** to 1 (To be considered for funding - Pending Award) and the **Council Priority** to *CON* (Council has concurred with IRG recommendation).

There is also the ability to set the **Intent to Pay Code** field, the **Council Recommendation Code** field, and the **Council Priority** field to NULL.

NOTE: For SBIR/STTR programs, if the **Intent to Pay Code** has not been set twelve months after the application submission, the system automatically sets the **Intent to Pay** code equal to *D (Deferred)* and a Deferred Intent to Award email is sent to the application.

Screen Field Information

The following field descriptions are listed in the order of appearance on the *Set Intent to Pay* screen.

Field	Description
ActivityCode/IC/ Serial #	The activity code, IC, and serial number of the grant application.
PI Name	The principal investigator's first and last name.
Priority Score	The priority score as a result of the SRG meeting.
Percentile	The percentile as a result of the SRG meeting.
Council Round	Calendar year and month of the review cycle in which the council reviewed the application.

Field	Description
Application Received Date	Receipt date of the application.
Intent to Pay	ITP code value (D, N, Y, NULL, or no action).
Notification Sent	Color-coded badge indicating notification status.
Fiscal Year	The fiscal year of the grant application.
Council Details (IC, Council Date, Recom Code, Priority)	Results of the council round - the IC assigned, the council date, the recommendation code, and the priority results.

Set Intent to Pay and Preview Intent to Pay Screen Fields

Notification Behavior for VA and FDA

VA and FDA staff search for grant applications in the [Intent to Pay \(ITP\) Search](#) screen, and then use the [Set Intent to Pay \(ITP\)](#) screen to manually set the **Intent to Pay Code** of reviewed applications to either Yes or No. When the ITP Code is set, the system performs these actions:

- If ITP Code = Yes — Appl status is updated to 35, "To Be Paid," and a notification is sent to the recipients listed below and also saved to Grant Folder Events tab. This notification informs the applicant that they are probably selected for funding.
- If ITP Code = No — Appl status is updated to 97, "Not Awarded," and a notification is sent to the recipients listed below and also saved to Grant Folder Events tab. This notification informs the applicant that they have not been selected for funding.

NOTE: These notifications are sent to the PD/PI and Signing Official, and CC'd to the Grants Management Specialist and Program Official (and for FDA, also to the IC Central Mailbox for FDA: OAGSGrantsPolicy@fda.hhs.gov).

NOTE: For text of VA and FDA Notice Of Intent emails, see [External Notifications](#).

Search Results Actions

The default sort is based on the **Activity Code/IC/Serial Number**.

- To sort the data, click on the appropriate column heading (except *Select*) in the search results.
- Perform one of the following options to select the appropriate grant applications to be updated:
 - a. Use the Bulk Actions to check or uncheck all results, or to check or uncheck only all visible results.
 - b. To select specific grant applications, click in the appropriate check boxes next to the specific grant applications.
- Perform one or more of the following options:
 - a. Click the **Preview Update** button to preview the updates.
 - b. Click the **Save Update** button to save the updates.
 - a. If some records fail the system validations and cannot be updated, the system displays the *Set Intent to Pay Preview* screen to provide more details about the failure.
 - c. Click the **Export** icon to export the hitlist to an Excel file.
- Clicking the **Preview Update** button displays the *Set Intent to Pay Preview* screen. For more information, please refer to the [Set Intent to Pay Preview](#) topic.
- Clicking the **Save Update** button displays a pop-up confirmation screen.

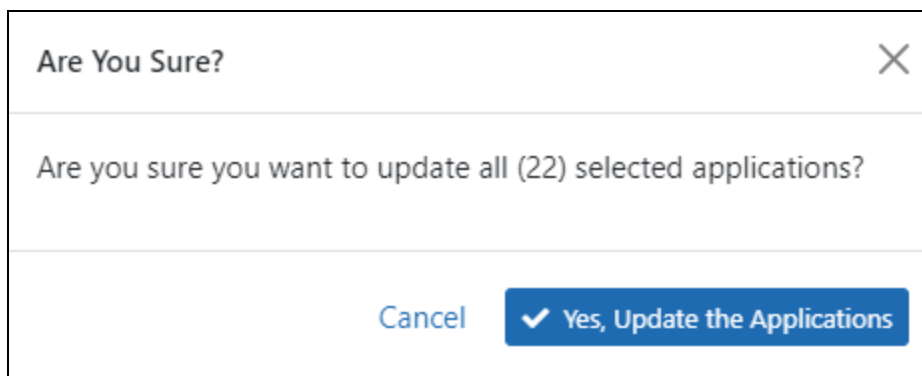

Figure 30: Save Update Confirmation screen

- Click **Yes, Update the Applications** to save all the updated applications and refresh the *Set Intent to Pay* screen with the list of grant applications which match the previously used search criteria. If the grant applications no longer match the previously used search criteria after the update, they do not show up in the search results after the save is executed. A green confirmation banner appears above the hitlist.
- Click the **Export to Excel** hyperlink to export the data to an Excel file including the following:
 - All records and columns from the hitlist
 - Multiple rows for the same grant number in cases where there are multiple council detail records
 - Sorted by Activity Code, IC, and Serial Number
 - Hitlist in a Comma Separated Values (CSV) Excel file

Setting the Council Recommendation Code/Priority Code

Set ITP Code to Yes

When the ITP code is set to Y (Yes) on the *Set Intent to Pay* screen, the system set the default values for the following fields as follows:

- **Set Council Recom Code:** 1 – To be considered for funding (CF)
- **Set Council Priority:** CON – Council Concurred with IRG recommendation

If the ITP code is changed to any other value than Y, the values in the **Set Council Recom Code:** and the **Set Council Priority:** fields are set back to *No Change*.

Dual ICs

There is the ability to set council detail fields for dual ICs. If the default IC is set to a dual IC, only the **Council Recommendation Code** and the **Council Priority** fields can be updated for the dual IC.

Primary and Dual ICs

The following tables outline per role the fields that can be updated for primary and dual ICs (co-funded grant applications) on the *Set Intent to Pay* screen:

Example - application, co-funded by AI

	User Role	
User Default IC Setting	ITP_GRANT_UPDATE_ROLE	ITP_COUNCIL_UPDATE_ROLE
OD	For OD Council: • ITP Code • Fiscal Year • Council Recommendation Code • Priority Code	For OD Council: • Council Recommendation Code • Priority Code
AI	For AI Council: • Council Recommendation Code • Priority Code	For AI Council: • Council Recommendation Code • Priority Code

Setting Council Details for Primary IC = OD

Cannot Set ITP Code for Council Recommendation Code Equal 2 or 6

The ITP code is not updateable for the following conditions:

- Council Recommendation code of 2 (*Not Recommend for Further Consideration (NRFC)*) – (Application Status code = 08)
- Council Recommendation code of 6 (*Not Considered by Council*) – (Application Status code = 28)

If the user attempts to update the ITP code for either of these Council Recommendation codes, then the system displays the following warning messages based on the Council Recommendation code present:

- Intent to Pay cannot be updated because council recommendation is set to 2 – NRFC.
- Intent to Pay cannot be updated because council recommendation is set to 6 (Not Considered by Council).

If the user sets the Council Recommendation Code to a value other than 2 or 6, then the **Intent To Pay Code**, the **Fiscal Year**, and the **Council Priority** are updateable again.

NOTE: During the nightly batch process the ITP code is set to *No* when the review outcome is *Not Recommended for Further Consideration (NRFC)* or *No IRG Recommendation*. **This applies to council round 201405 and beyond.**

Set Council Recommendation Code to 3

If there is an attempt to set the **Council Recommendation Code** to 3 (*Deferred*), the system displays a pop-up screen with the following message: If the application needs to be re-reviewed by IRG, please click "Cancel", and request the IRG re-review through the ACR system.

1. If the **Save Update** button is clicked on the pop-up screen, the system continues with the updates for the primary and dual ICs.
2. For primary ICs only, the Council Recommendation Code and Priority Code are set to blank and the Council Meeting Date is set to the next valid council date.

Set Council Recommendation Code to 6

The **Council Recommendation Code** cannot be set to 6 (*Not Considered by Council*). The value is removed from the List of Values (LOV) for the **Set Council Recom Code**: field.

Set Council Recommendation Code to 7

The **Council Recommendation Code** cannot be set to 7 (*IC Designated Not Considered*) if the Initial Review Group (IRG) action is set to 6 (*Not Discussed*).

1. If the Initial Review Group (IRG) action is set to 6 (*Not Discussed*), the following warning message is displayed at the top of the *Set Intent to Pay* screen: There are some records that cannot be updated, please review the flagged records below.
2. The following mouse over text also appears for each appropriate record: The Council Recommendation cannot be updated to 7 – IC Designated Not Considered because IRG Recommendation Code is 6 – Not Discussed.
3. If the **Save Update** button is clicked on the *Set Intent to Pay* screen, the system displays the *Preview Intent to Pay* screen in case there is a system validation error.

Council Recommendation Code Equal 9

The **Council Recommendation Code** of 9 (*Advance to the Current Fiscal Year*) does not appear in the List of Values (LOV).

Set Intent to Pay Preview Screen

The *Set Intent to Pay Preview* screen displays the appropriate grant applications that were selected to be updated, with the appropriate updates that users choose from the *Intent to Pay* screen. Changes to each application can be previewed prior to saving the change.

ActivityCode/IC/Serial#	PI Name	Priority Score	Percentile	Council Round	Application Received Date	Intent to Pay	Notification Sent	Fiscal Year	Council Details: IC	Council Date	Recom Code	Council Priority
1F300D034-01A1	Jordan, Lee	50		202310	04-06-2023	Y	Not Sent	202310	DK	202310		
1C060D036-01	WEASLEY, FRED	50		202310	02-24-2023	Y	Not Sent	202310	OD	202310	1	CON
1S100D036-01	Finnegan, Seamus	50		202401	06-01-2023	Y	Not Sent	202401	GM	202401	1	CON
1S100D036-01	THOMAS, DEAN	51		202401	05-31-2023	Y	Not Sent	202401	GM	202401		
								2024 MH	OD	202401	1	CON

Figure 31: Set Intent to Pay Preview Screen

A yellow banner at the top of the Preview screen lists the values to be updated.

Click the **Cancel** button to cancel the updates and return to the *Intent to Pay* search screen. OR

Click the **Save Update** button to save the updates.

1. A pop-up confirmation message appears.
2. Click **Yes, Update the Applications** to continue and save all the updated applications, refreshing the *Set Intent to Pay* screen with the list of grant applications which match the previously used search criteria.
3. If the grant applications no longer match the previously selected search criteria, they do not appear in the search results after saving. A green confirmation banner appears above the hitlist.
4. Any grants that cannot be updated display a warning icon after the grant number. Hover your cursor over the icon to display a message about the issue.

Notifications

Intent to Pay (ITP) external notifications are only sent out for the following grant applications:

- Veterans Administration (VA)
- Food and Drug Administration (FDA)
- National Institutes of Health (NIH)
- Small Business Innovation Research (SBIR)
- Small Business Technology Transfer (STTR)
- Competing SBIR/STTR grants types:
 - 1 (New)
 - 2 (Competing Continuation)
 - 9 (Change of NIH Awarding IC for a Renewal Application)
 - 3 (Competing Revision/Administrative Supplements)

The following grant statuses and status groups are excluded from notifications process:

- Withdrawn applications with status of 01 (Administratively Withdrawn by IC)
- Withdrawn applications with status of 02 (Withdrawn)
- Withdrawn applications with a status of 30 (Withdrawn by IC - Other Version Encumbered)
- Status of 19 (Award prepared, not funded)
- Terminated Status Group (Status of 03 - Award Terminated)
- Awarded Status Group
 - Status of 05 (Awarded Non-fellowship Only)

The Intent to Award notification displays in [Grant Folder Correspondence tab](#), in the *Other* section. The **Intent to Award** email notification also appears in the external Grant Folder (PI View – *Status Information* screen).

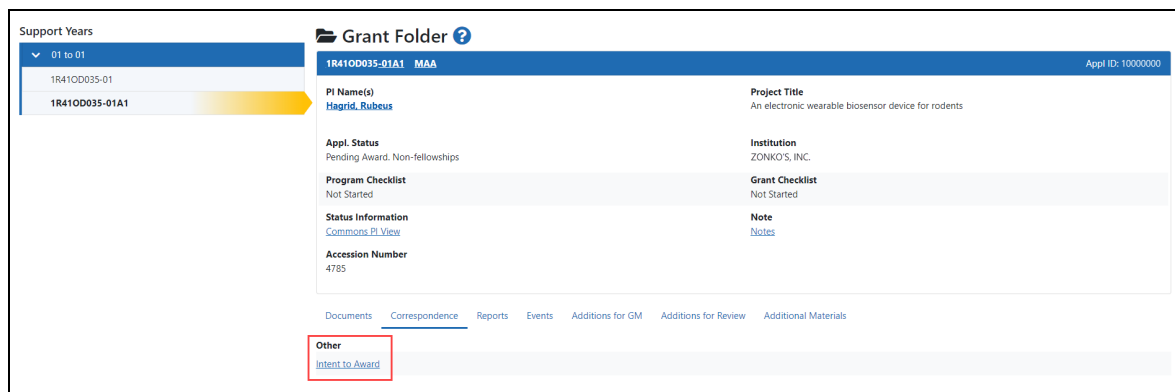

Figure 32: Grant Folder Screen Displaying the Intent to Award Hyperlink

NOTE: If the **Intent to Pay** code has not been set twelve months after the application submission, the system automatically sets the **Intent to Pay** code equal to **D (Deferred)** and a Deferred Intent to Award email is sent to the application.

For more information on notifications to the applicants, please refer to the [External Notifications](#) topic.

Internal notifications are sent based on the receipt date of the application and the ITP code value. For more information on internal notifications, please refer to the [Internal Notifications](#) topic.

External Notifications

The appropriate email notifications are sent out for **Intent to Pay** codes of Y (Yes), N (No), and D (Deferred). They include the contact Principal Investigator (PI) and the contact for the organization for the application. A copy is sent to the central mailbox of the administering IC responsible for the grant application.

To meet the SBIR/STTR Reauthorization requirement, the ITP system sends Intent to Pay Notifications to the applicants (Principal Investigators and Signing Officials) on the first day when the ITP code is set. After the ITP code is set for the first time, the user has until the end of the day to make any changes. Then the eNotification is sent to the applicant that night. Subsequent changes to the ITP setting on a different day will not result in new notifications.

The system performs the following checks before generating the appropriate email notification:

1. The ITP Code is set.
2. No ITP notifications have been sent out before.
3. It is a SBIR/STTR competing type application.

The system also records the date and time when the email notification is sent.

The email notifications are kept in both the Commons and the internal Grant Folder for later viewing. There are hyperlinks to the email notifications and the hyperlinks display in a sub-section titled *Other* under the *Correspondence* section heading.

SBIR/STTR Funding Decision Emails

SBIR/STTR Probable Funding Decision for <grant number of the application>

To: <PI Name>, <SO Name>

CC: IC Central Mailbox

Subject: SBIR/STTR Funding Decision for <Grant Number>

Dear <PI Name>,

This email serves as notification that application, <Grant Number>, has been selected for probable funding by <Institute Name>. This is not the official Notice of Grant Award, but a Notice of Intent to fund the application. A final decision on funding will be based upon further <Institute Name> staff review of the application, and the receipt and review of any additional information that may be requested by <Institute Name> staff.

If your organization has received a request for Just-in-Time (JIT) information regarding this application, please see the Just-in-Time web page at <http://grants.nih.gov/grants/peer/jit.pdf> for information required by the NIH before an award can be issued. Contact information for the Program Official and Grants Management Specialist is provided below.

Subject: Notice of Intent for 1 I21 RX123456

*** This is an automated notification - Please do not reply to this message. ***

Notice of Intent

Issue Date: 29-MAY-2021

Department of Veterans Affairs

Application Number: 1 I21 RX123456-01A1

Principal Investigator(s): John Q. Investigator

Project Title: Sample Project Title Of This Grant Application

SOMENAME VA HOSPITAL

ANYTOWN IL 12345

This message serves as a notification that the application, 1 I21 RX123456-01A1, has been selected for probable funding by Rehabilitation Research & Development. This is not the official Notice of Award, but a Notice of Intent to fund the application. A final decision on funding will be based upon further Rehabilitation Research & Development staff review of the application, and the receipt and review of any additional information that may be requested by Rehabilitation Research & Development staff.

It is the PI's responsibility to move forward with the completion of compliance requirements noted in the Just in Time (JIT) system (e.g., response to conditions, IRB/IACUC Committee approval, required training for human/animal research, R&D Committee approval, and PI assurance to comply with all VA policies including intellectual property and disclosures) as quickly as possible. All JIT documents must be uploaded into the JIT Document Manager by the Research Office within 180 days.

Note: If the JIT is not completed within 180 days, the project may be withdrawn from consideration for funding.

The Program Officer (PO) is responsible for the scientific, programmatic and technical aspects of this project. The Grants Management Specialist (GMS) is responsible for the administrative aspects of this project. Contact information is provided below.

Internal Notifications to Agency Staff

The following conditions apply for internal email notification reminders:

- For SBIR/STTR grant applications only
- Generated based on the receipt date of the application and the ITP code value
- Sent on the tenth of each month
- Include the number of applications that fit the criteria
- Sub-projects are excluded from the list of applications
- Not displayed in the external and internal Grant Folder
- The reminder email can be accessed through a QVR Report (future enhancement)

Email reminders are sent as follows:

- **Eighth Month Reminder**
 - Includes applications that the ITP code has not been set and the an application receipt date of 8 to 9 months old
 - Excludes applications that are still in review (no IRG Recommendation Code)
 - Excludes applications with a review score of Deferred (DF)
 - Sent to GMO and primary PO with their consolidated list of applications
 - Sent to the appropriate IC central email in-box
- **Eleventh Month Reminder**
 - Includes applications that the ITP code has not been set and an application receipt date of 11 to 12 months old

- The 11 month reminder goes to:
 - Each assigned GMO and primary PO with their consolidated list of applications
 - Each appropriate IC central email in-box with the IC's consolidated list of applications

The list of applications in the internal email reminders are stored for reporting purposes.

8-Month Reminder: Intent to Pay Not Set for Small Business Applications

From: era-notify-dev@mail.nih.gov Sent: Tuesday, March 11, 2014 10:17 AM To: GMO Name, PO Name, IC Central Mailbox Subject: 8-Month Reminder: Intent to Pay Not Set for Small Business Applications - <IC> (mm-yyyy)					
*** This is an automated notification - Please do not reply to this message. ***					
This is a reminder that the Intent to Pay code has not been set for the following SBIR/STTR applications that were received by the NIH 8 – 9 months ago:					
Application ID	Grant Number	Project Title	Application Received Date	Council Round	Priority Score
9999999	R44HL999999-05	Therapeutic Thrombin Analogs	06/12/2013	201401	20
