1. PURPOSE

The purpose of this document is to provide a general description and usage guide for eRA's Additions for GM Document Upload Web Service.

2. GENERAL DESCRIPTION

The Document Upload REST Web Service is for systems to upload documents into eRA database using HTTP protocol.

3. SECURITY

Secure Socket Layer (SSL) client certificate is required for authentication and authorization. The GM_EADDITION_DOC_UPLOAD_ROLE role is needed for system accounts to upload documents. In addition any of the following roles is needed for user accounts: GRANT_SPECIALIST, GRANT_MANAGEMENT_OFFICIAL

4. PRE-REQUISITES

The caller must have a certificate from an authorized certificate provider that has been configured/registered for accessing this service. Information on the usage of certificates can be found at http://inside.era.nih.gov/files/S2S_guide_for_eRA_webservices.pdf.

The certificate used to connect to the service must be mapped to an IMPACII account that has GM_EADDITION_DOC_UPLOAD_ROLE role as part of the account registration process. In addition any of the following roles is needed for user accounts: GRANT_SPECIALIST, GRANT_MANAGEMENT_OFFICIAL

5. SERVICE LOCATIONS

- Test--
<https://services.internal.test.era.nih.gov/grantfolder/api/eadditions/upload/{docType}/{applId}/{user}>
- Stage --
<https://services.internal.stage.era.nih.gov/grantfolder/api/eadditions/upload/{docType}/{applId}/{user}>
- Production --
<https://services.internal.era.nih.gov/grantfolder/api/eadditions/upload/{docType}/{applId}/{user}>

6. OPERATIONS

Document Upload Web Service supports the following operations:

Operation	Input parameters	Output parameters	Role needed
POST (Upload document)	docType applId user uploadFile docLabel comments	HTTP Status code Message	GM_EADDITION_DOC_UPLOAD_ROLE (for system) User (userId) should be a GRANT_SPECIALIST or GRANT_MANAGEMENT_OFFICIAL for the application's (applId) primary or dual IC (for user accounts)

7. SUPPORTED DOCUMENT TYPES

The supported document types are listed below:

Doc Type Code	Doc Type Description
AAD	Animal Assurance
ACI	Audit and COI Issues
AD	Award Documents
CFD	Co-funding Documents
CLD	Closeout Document
EXT	External Documents
FND	Financial Documents
FPM	Funding/Pay Memos
GSH	Grant Spreadsheet
HIS	Historic Documents
HSD	Human Subjects
INT	Internal Documents
JID	JIT Documents
NCE	eRA NC Extension
NRD	NRSA Documents
RAA	Revised Aims and Abstract
TRA	Transfer Documents

8. INPUT VALUES AND OUTPUT VALUES

8.1 POST

8.1.1 Description

The POST operation adds a new document to the eRA database. If the operation is successful, a status code will be returned with a message.

8.1.2 Request Parameters

The request parameters are in the URL and request body. The URL is like the following:

https://services.internal.era.nih.gov/grantfolder/api/eadditions/upload/{doctype}/{appl_id}/{user}
}

The parameters are listed below:

Name	Description	Parameter location	Required
<i>docType</i>	A 3 character string to indicate the type of the document. Type: String	URL	Yes
<i>applId</i>	The APPL Id. Type: String	URL	Yes
<i>user</i>	The user id of the user uploading the document	URL	Yes
<i>docLabel</i>	Document label Content-Disposition: form-data; name="docLabel "	Body, form field.	No
<i>comments</i>	Document comment Content-Disposition: form-data; name="comments"	Body, form field.	No
<i>uploadFile</i>	Document file content. Type: multipart/form-data The multipart name must be "uploadFile".	Body, form field.	Yes

8.1.3 Supported File extensions

Supported file extensions while uploading the document is as follows for all doc types except **RAA**

PDF, Word Document (.doc,.docx file format), Microsoft Excel (.xls,.xlsx,.xlsm file format), text file, Outlook Message file (.msg file format) and Video file (.wmv, .avi, .mov, and .mp4)

RAA doc type allows only Microsoft Word document (.docx format)

8.1.4 Responses

The standard HTTP response codes and a text message will be returned.

9. RESPONSE CODE AND MESSAGES

Document Upload Web Service has following response codes, messages (with their meanings).

HTTP status code	Message	Meaning
201	Document saved successfully.	POST success.
403	Access denied.	Insufficient privilege.
400	Invalid parameters.	Invalid parameters such as doc type, Appl id, User, missing content.
500	Internal error.	Internal server error.

10. SAMPLE HTTP TRACE

10.1 POST

Sample request:

POST /grantfolder/api/eadditions/upload/FND/7230682/NWOSUT

Host: services.internal.test.era.nih.gov

Cache-Control: no-cache

Content-Type: multipart/form-data;

Content-Disposition: form-data; name="docLabel"

Content-Disposition: form-data; name="uploadFile"; filename="testing.docx"

Content-Type: application/vnd.openxmlformats-officedocument.wordprocessingml.document

Content-Disposition: form-data; name="comments"

11. INTERNET STANDARDS

The following are the standards about file upload through HTTP RESTful service.

Term	Standards	URL
HTTP Request Methods	IETF RFC 2616: Hypertext Transfer Protocol -- HTTP/1.1	http://en.wikipedia.org/wiki/HTTP#Request_methods http://tools.ietf.org/html/rfc2616
Multipart Form Data	IETF RFC 2388: Returning Values from Forms: multipart/form-data	http://tools.ietf.org/html/rfc2388
HTML File Upload	IETF RFC 1867: Form-based File Upload in HTML	http://tools.ietf.org/html/rfc1867
